Pause stolen er designet, så den fremtræder med samme spændstighed og positivitet både for- og bagfra, da stolen i dens daglige brug vil opleves ligeligt fordelt fra begge vinkler – måske endda mere bagfra. Stolens lette konstruktion gør den til en rigtig letvægter, der passer perfekt til f.eks. kantiner eller konferencelokaler. Kan uden besvær stables eller stilles op i rækker til konferencen. Stolen fås med eller uden armlæn og leveres også som taburet.

The Pause chair is designed to appear with the same resilience and positivity both from the front and the back side, as the chair will be seen equally from both angles during its daily use - maybe even more from behind. The light construction makes Pause a genuine lightweight chair, perfectly suited for e.g. canteens and conference rooms. The chair is easily stacked or put in rows for the conference. Pause is available with or without arm rests and as a stool as well.
